Professional Experience (4+ years)

Daimler/ Mercedes-Benz USA (Lab 1886) - Innovation Sector

Sep 2019 - Present (van2share.netlify.com - NOT the live app - Demo - use "aaa" for email)

- Leading Front End Development for production application (van2share - mobile responsive application where users can find and book Mercedes Sprinter Vans + other vehicles, and unlock/lock directly from the application.)
- Built out front-end of entire application, plus two different B2B facing use cases while onboarding customers.
- Continuing to work throughout the company on different projects + new ideas.

DRAPED(E-Commerce), Web Developer & Designer

May 2017- Sep 2019 - (www.DrapedOfficial.com)

- Led the build, customization, and responsible for updating the site's functionality and design using with JS, jQuery, HTML, and CSS + frameworks.
- Also Including: content management, product cards and add to cart- checkout, promotion and discount codes, blog integration, and SEO

Self-Employed, Freelance Web Developer & Designer (*see Github)

Jan 2019 - Sep 2019 (tflearydev.github.io)

- Creating Full Stack Javascript and React applications, along with CMS apps.

Presidential Automotive, Manager/ Developer

Aug 2015 - Aug 2017 (Promotion 2016: Manager / Developer)

- Developed a simple customer-vehicle management application (that wasn't asked of me-not required) to keep track of their customers, cars on the lot, and shops nearby, which earned me a PROMOTION.
- Maintained vehicle-management system along with website and daily ops.

General Assembly, Software Engineer

- 850+ hours of more JavaScript, jQuery, React, Bootstrap, Node, MongoDB, JSON, MVC, RESTful web services, Express.js and more

Full Stack / Git Version Control

Van2share (Github)-<https://github.com/tflearydev/van2share>
