## Professional Experience

### DRAPED(E-Commerce), Software Engineer & Web Developer

Aug 2017- Present - ([www.DrapedOfficial.com](http://www.DrapedOfficial.com))

- Responsible for building and maintaining the company's newest e-commerce web application. Functionality + design using JavaScript, HTML, CSS and more.
- Migrating application to React.js for the entire frontend UI view, based strictly around reusable components with dynamic updating. In development build.
- Also: API Integration, product cards, header, add to cart + checkout, social media store integrations, promotion codes, blog integration, SEO, some content management and more.

### Self-Employed, Freelance Web Developer & Designer

May 2019 - Present ([tflearydev.github.io](https://tflearydev.github.io))

- Creating robust solutions for clients while using JavaScript, React.js, Node.js, MongoDB, Express.js, HTML5, CSS3 + Bootstrap, CMS platforms and more.
- React.js: frontend library I use to speed up productivity. The components generate a minimal set of changes to be made to the DOM which makes updating these applications lightweight and fast.
- Node, MongoDB, Express.js on the backend! And CSS/Bootstrap/and React Styled Components for styling.

### Presidential Automotive, Manager/ Developer

Aug 2015 - Aug 2016 (Team Member)

Aug 2016 - Aug 2017 (**Promotion:** Manager / Developer)

- Developed a simple customer-vehicle management application to keep track of customers, cars on the lot, and shops nearby, which earned me a promotion. .
- Maintained vehicle-management system along with website and daily ops.

### General Assembly, Software Engineer

- 850+ hours where I elevated my expertise in: Git, Github, JavaScript, jQuery, React.js, Node.js, MongoDB, Express.js, MVC, RESTful, Cloud platforms & more.

## Full Stack Applications.

### Startup Investor App (Github)- <https://github.com/tflearydev/StartupRocket>

- Simple build for startups and investors to create their profiles and connect.
- Frontend: React.js, JavaScript, HTML, CSS (Bootstrap & React Styled Components)
- Backend: Node.js, MongoDB, Express.js

### Collectables App (Github) - <https://github.com/tflearydev/SneakerCollect>

- Application that allows collectors to buy/sell/trade their collectables
- Frontend: React.js, JavaScript, HTML, CSS
- Backend: Node.js, MongoDB, Express.js

### Vehicle Manager App (Github)- <https://github.com/tflearydev/VehicleManager>

- Application for auto businesses to manage their day to day operations
- Frontend: JavaScript, jQuery, HTML, CSS
- Backend: Node.js, MongoDB, Express.js

## Skills
