## Professional Experience (2+ years)

### DRAPED, Web Developer & Designer

May 2017- Present - [www.DrapedOfficial.com](http://www.DrapedOfficial.com)

- Responsible for building/customizing/updating the site's functionality and design using JavaScript, jQuery, HTML, and CSS frameworks while also managing backend database. (CURRENTLY testing new features in REACT, not yet in production)
- Functionality for filling and saving forms, signing up customers, selecting garments and criteria, add to cart, checkout, pulling data, etc. Styling layout, cards, garments, jumbotrons, and more.
- *Company's social media followers grew to over 10,000 and orders placed on site increased by 5X*

### Presidential Automotive Managing Developer

Aug 2015 - Aug 2016 (Team Member)

Aug 2016 - Aug 2017 (Promotion: Managing Developer)

- Developed a simple customer-vehicle management system (that wasn't asked of me-not required) to keep track of their customers, cars on the lot, and shops nearby, **which earned me the PROMOTION.**
- Maintained vehicle-management system application along with website and daily operations.

### General Assembly Software Developer

- 850+ hours where I polished and honed my skills and understanding in technologies including:
- JavaScript, jQuery, React.js, HTML, CSS Frameworks, Node.js, MongoDB, JSON, Express.js, Python, SQL, Django, and more.

## Full Stack Applications

### Startup Investor App (Github)- <https://github.com/tflearydev/StartupRocket>

LIVE SITE DEMO ([MERN STACK](#)) - <https://startup-rocket.herokuapp.com/>

- Frontend: JavaScript, React.js, HTML, CSS (Bootstrap & Styled Components)
- Backend: Node.js (APIs), MongoDB (Database), Express.js (Routing)
- Advanced function forms
- Simple app for startups and investors to create their profiles and connect.

### Collectables App (Github) - <https://github.com/tflearydev/SneakerCollect>

LIVE SITE DEMO ([MERN STACK](#)) - <https://sneaker-collect.herokuapp.com/>

- Application that allows collectors to buy/sell/trade their collectables
- Frontend: JavaScript, React.js, HTML, CSS(Bootstrap, Styled Components)
- Backend: Node.js, MongoDB, Express.js

### Vehicle Manager App (Github)- <https://github.com/tflearydev/VehicleManager>

LIVE SITE DEMO - <https://admin-vehicle-manager.herokuapp.com/>

- Quick application for automotive businesses to manage their day to day operations (customers, vehicles on lot, and outsourced shops)
- Frontend: JavaScript, Handlebars, HTML, CSS(Bootstrap)
- Backend: Node.js, MongoDB, Express.js

## Skills

JavaScript | jQuery | React.js | Node.js | MongoDB | JSON | Express.js | MVC | Git | Github | HTML | CSS | Bootstrap | CMS | REST API | Agile Methods | MySQL | SASS | Debugging | Database Management | AWS | Photoshop | Illustrator | Business Development |

## Summary

Full stack developer focused on enhancing user experiences and creating scalable applications by using dry, efficient, and reusable code along with my creativity and innovation. Passionate for the JavaScript stack on the front-end + back-end along with being well experienced in the technologies above.

## Education

### General Assembly:

Thrived in a 3+ month, 800+ hour software development immersive program at General Assembly- Atlanta.

### Georgia State University:

Nearing BBA in the Business-Entrepreneurship concentration.

### North Carolina State University:

Initial college education, studying business management.
